

Integrated Receivables Platform For Banks

Enterprise EIPP powered by RadiusOne

Enabled by the RadiusOne Supplier-Buyer Network, HighRadius Electronic Invoice Presentment and Payment (EIPP) Cloud enables suppliers and buyers to collaborate on invoicing and payments over a single platform.

About The Solution

HighRadius Enterprise EIPP Cloud provides a self-service customer portal to bring buyers and suppliers on a single network to eliminate complexity in managing credit-to-cash for a large customer base. The system supports multiple invoice formats and different modes of transmission (fax, email, print and mail). A rich search capability enables efficient storage and retrieval of past invoices. The result is faster invoicing and payment collection, better customer service, profitability and cash flow.

Why Companies Need Enterprise EIPP

- **Reduce Days Sales Outstanding (DSO) by 10%**
Single network helps your client interact with their customers and shortens the cycle time of payments.
- **Reduce lockbox processing costs by 30%**
Easy-to-use, intuitive user interface that enables access to high level account status and history as well as drill down to specific invoices of interest and scheduling payment converts 80% of checks into ACH Payments.
- **Reduce billing costs by 50%**
Efficient system enables self service by transforming a manual, paper intensive invoicing process into one that is automated and electronic.
- **Reduce accounting department's operating costs by 30%**
A customer self-service portal results in reduced to-and-fro for simple information
- **Reduce cost of managing deductions and collections**
Removes the inability to proactively prevent deductions for small customers by preventing disputes before they are created
- **Improve customer service and satisfaction**

Key Features

- Self-service customer portal provides a single point of accessing full invoicing history
- Automated invoice communication supporting multiple media, including email and fax
- Supporting proof-of-delivery, bill-of-lading, and other shipping documents are available with invoices to help prevent invalid deductions before they are taken
- Credit Card and ACH/eCheck payments support via integration with multiple processors
- Ability to produce remittance data for quick accounting books reconciliation
- Seamless integration with ERP and accounting systems enables accurate and timely invoice presentment
